ing some strong articles about the evils of race track gambling, and which will prove valuable contributions to the anti-race track crusade in this and other

But Elbert also makes some bad lapses. Having no religion of his own to speak of, he has taken delight in poking at other people's religion. That is a mistake.

The man who jabs at things so sacred as man's religion lays himself liable. To put it on critical grounds alone, the destructive critic is always in danger, A shrewd dialectician will never champion a negative. And when you say another man's religion is false or a sham you are up against it to prove that yours is a better one.

Some time ago Mr Hubbard went after the revivalists-notably Mr. Chapman and "Billy" Sunday, whom he charged with being in the business for revenue

Which, of course, invites attention to Mr. Hubbard's own style of graft.

Simply because a man is engaged in religious work, must he starve or go naked? It might easily be shown that the two revivalists mentioned are able to make more money at other business. And what they earn they are entitled

But the main thing is this: Some of their methods aside, methods that smack of the Hubbard cult, revivalists do an immense amount of good. We remember that Mr. Chapman was credited with Sykes for the sum of \$15.

On motion Commissioner Rogers, having cleaned up Denver morally, as it seconded by Commissioner Solano, said was never cleaned up before. And "Billy" Sunday has literally transformed the atmosphere of scores of towns. Can Mr. Hubbard point to any such

accomplishments? These revivalists attack the citadel of good citizenship-men's hearts. They

fight evil in low and high places. They develop civic righteousness. The fact is this East Aurora philos opher (or fakir) should infuse more

sweetness and light into his philosophy. He needs a wider vision of the need for helpfulness. And more charity in

A Storekeeper Says:

"A lady came into my store lately and said

"I have been using a New Perfection Oil Cook-Stove all winter in my apartment. I want one now for my summer home. I think

these oil stoves are wonderful, comfort they are, they would all have one. I spoke about my stove to a lot of my friends, and they were astonished. They thought that there was amell and smoke from an oil stove, and that it bested a room just like any other. that it heated a room just like any other stove. I told them of my experience, and one after another they got one, and now, not one of them would give hers up for five times its cost."

The lady who said this had thought an oil stove was all right for quickly heating milk for a baby, or boiling a kettle of water, or to make coffee quickly in the morning, but she never dreamed of using it for difficult or heavy cooking. Now—she knows.

Do you really appreciate what a New Perfection Oil Cook-Stove means to you? No more coal to carry, no more coming to the dinner table so tired out that you can't eat. Just light a Perfection Stove and immediately the heat from an latense blue flame shoots up to the bottom of pot, kettle or even. But the room isn't heated. There is no smoke, no smell, no outside heat, no drudgery in the kitchen where one of these stoves is used.

New Perfection

Do farmers eat the proper sort of food?

The farmer of today buys a much larger proportion of the food that goes on the table than he did ten years ago. It's a good thing that this is so because he has a great variety to select from. He should, however, use great care in selecting for the best results in health and strength.

The widespread tendency in the cit, to increase the amount of Quaker Oats eaten is due very largely to the recent demonstrations by scientific men that the Quaker Oats ted man is the man with greatest physical endurance and greatest mental vigor.

Farmers should give this subject careful thought and should increase the quantity of Quaker Oats eaten by themselves, their children and the farm hands.
